

## Ideas to projects

1. Start with a general idea:

2. Brainstorm more specific topics from your general idea:

3. Choose ONE specific topic that interests you:

4. The next step is to create a thesis. What is a thesis?

**A THESIS is a provable assertion that creates a purpose for your research and informs the reader what to expect from your work.**

5. Write your thesis in the box below. Remember that you will be proving an idea that originated with you.

6. Create a list of primary and secondary sources that might help you in your research:
